MOTOR BODIES

# The Bull Story

Bull Motor Bodies is Western Australia's leading supplier of aluminium service bodies, flat trays and toolboxes. The company has grown from the desire of its owners, Andy Park and John Porteus to build the country's best range of aluminium ute bodies

After eight years of manufacturing service bodies, John and Andy re-designed the Mark II range. Approximately \$1m was spent on 3D modelling technology and prototyping, producing a new benchmark in aluminium ute body design.

Since introducing the Mark II range, Bull Motor Bodies has grown to become one of Australia's leading motor body builder. This is evidenced by repeat orders from individuals, through to major government and private organisations.

## What Makes Bull Different

### **Bull Motor Bodies is 100% Australian Owned and Operated**

Located in O'Connor, near Fremantle, our 2000 sq/m manufacturing facility transforms raw materials into complete 'drive away' products.

### **Bull Motor Bodies utilises state of the art 3D computer design software to ensure accuracy reliability and quality - 100% of the time**

Every component is standardised and built in specialised jigs to ensure the same outcome of quality every time. Bull Motor Bodies guarantee all of their products to be completely water and dust proof.

### **Friendly and professional service**

Over the last ten years, Bull Motor Bodies has built a market leading reputation of providing efficient, friendly and professional service.

### **Extensive Product Range**

Bull Motor Bodies products range from aluminium and steel flat trays, toolboxes and trailers, through to our legendary fully integrated enclosed canopy. Our extensive range of internal, electrical and external options allows any user to 'customise' your vehicle to suit your need or lifestyle.

### **Style and Security**

By Using state of the art automotive materials, we have developed the most stylish and secure canopy in Australia. This includes hidden internal hinges and seals, as well as, stylish and secure locking mechanisms.

## What our customers say

“ **Desiree Lawrance - Melville Toyota - November 2010**

In the ten years of working with Bull Motor Bodies, Melville Toyota has always received the highest level of customer service provided by highly professional staff. The turnaround times for fit outs are always on time and on budget. We have used their bodies on our service Hilux's and we have found them to be the best. Thank you, Bull.

“ **David Van Der Made - Whelans - November 2010**

As a company that works in the field of construction, we have experimented with a number of canopy configurations for our fleet over the years. Since the introduction of the Bull Canopy to our fleet, feedback from our staff has been more positive than with any of our past products and with this, we again fitting a Bull Canopy to latest addition of our fleet. The staff have indicated that it is now a pleasure to work out a vehicle that not only accommodates all of their equipment storage needs easily and safely but more importantly the configurations from an ergonomic perspective has minimised the risk of personal injury as accessibility to their tools can now be done from a full erect standing position as opposed to having to lift gear whilst reaching in over tail gates.

The product is robust and easy on the eye and the bat wing doors afford absolute access as well as some overhead protection from the elements. My dealing with the sales team has been helpful and courteous. The visits to the factory and to see the production line has also given me a better understanding of the product I am being supplied. The team at Bull Motor Bodies are responsive to all my requests on the internal fitment designs with suggestions being made where they believed they could be improved. I would not hesitate to recommend the Bull Canopy product and hope to have a long and positive relationship into the future.

“ **Doug Bartlett - City of Mandurah - September 2010**

We moved to Bull Motor Bodies for our trade body needs after decades of experience with three other body manufacturers. We've found Bull Motor Bodies to be well constructed, robust, and cost competitive, with great service given by the staff. With their wide range of accessories and additions we have been able to satisfy our operators' needs in reticulation, building, painting and carpentry.

“ **Phil Jose - Electrix Pty Ltd - October 2010**

Bull Motor Bodies provide excellent service and craftsmanship for our new WA fleet with a tight time frame for delivery. We will be using them for further vehicle customisation in the future.

# The Trade Tuff Range

Bull Motor Bodies 'Trade Tuff' Range includes:

- Our strong and stylish Aluminium flat tray
- Tray mounted Aluminium Toolboxes
- Two door integrated bodies with tray section at rear
- 3 Door fully enclosed service bodies
- 2 Door bodies mounted to any existing flat tray.

Using 3D Design, a complete Aluminium structure and clever use of Automotive composite materials, the new 'Trade Tuff' range is engineered to be the strongest, most stylish and functional addition to any cab chassis ute.

With full length opening doors, internal seals and gutter systems, Bull Motor Bodies can guarantee our enclosed canopies and toolboxes to be both water and dust proof.

Once inside the canopy, you are presented with maximum usable floor space and a integrated channel mounting system to secure shelving, drawers and other items whilst in transit. Bull Motor Bodies offer an extensive range of internal and external fit-out options to suit any requirements.

Our whole Trade Tuff Range incorporates pre drilled mounting holes for every single cab chassis ute available on the market today. Therefore transferring your Bull Motor Body from one Ute to another is simple and cost effective. Combined with the strength and quality that goes into every build, your next Bull Motor Body will last you a life time.
