

# Bull canopies versus vans

Learn why single businesses through to large fleets across Australia are moving from vans to utility service vehicles.

## INTERCHANGEABILITY

Universal mounting system allowing you to transfer your service body from vehicle to vehicle

## SAFETY

Bull service bodies deliver superior access to tools and equipment. No need to climb into the van

## SECURITY

Your service body will offer better solutions for safe and secure storage of your tools and equipment

## COMFORT

Enjoy improved vehicle comfort, 5 star safety, and greater towing capacity whilst you work

## Interchangeability

### Making your investment go further

Bull Motor Bodies unique universal mounting system allows users to transfer all of our chassis mounted bodies from vehicle to vehicle regardless of make or model. Setup your body once and simply transfer it from ute to ute.

Our modular build system not only keeps the quality of our product to the highest of standards but also allows quick and cost effective repairs to be completed anywhere in the country.

## Safety

### Protect yourself, your workers and your family

All leading utes now have 5 star ANCAP safety ratings. No Van in Australia can match this. This added with superior gross vehicle and combined vehicle masses ensures your vehicle is both safe and compliant at all times.

Modern utes not only match the ride and handling of passenger vehicles but offer safety features such as stability control, anti lock brakes, curtain side airbags and traction control as standard.

## Security

### Protect your assets

Our vast experience in dealing with all industries across Australia means we have the most appropriate solution to suit your specific needs. These include shelving, drawers, workbenches, roof racks and underbody solutions to suit all your required tools and equipment.

Bodies are able to be connected to the vehicles central locking and alarm system giving you piece of mind when leaving your vehicle.

## Comfort

### Be comfortable no matter what the conditions

Utes provide better driver comfort and seat positioning relative to vans. Models are available in 4x4 allowing greater flexibility and performance in all conditions around Australia.

Our design of canopy allows easy access to all tools and equipment in comparison to a van where access is gained by climbing inside and stooping whilst you collect your tools or equipment. Bull canopies allow you to work at the correct height and enjoy protection from the elements under our gull wing doors.

## Why Choose Us

- 1 All of our products are designed using state of the art 3D design software. Everything is laser cut and built in jigs ensuring quality, accuracy and consistency.
- 2 Designed and built within Australia and with over 15 years in the automotive industry, Bull Motor Bodies have the expertise and team to provide solutions for your business.
- 3 With branches in Western Australia and Queensland we service Australia's largest fleets. These are supported through a national network of approved repairers.
